PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with hands-on experience in building end-to-end AI applications and data-driven solutions. Completed internships in Artificial Intelligence and Advanced Data Science. Developed a real-time facial emotion recognition system using OpenCV and DeepFace, and built responsive web applications. Proficient in Python, computer vision, data analysis, and modern web technologies. Seeking an entry-level opportunity in AI, Machine Learning, or Data Science to apply technical skills and contribute to innovative solutions.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

Annamacharya Institute of Technology and Sciences, New Boyanapalli, AP | CGPA: 7.90/10 | Oct 2022 – May 2026

Intermediate (MPC) | Sri Chaitanya Junior College, Kurnool, AP | 77% | Dec 2020 – Mar 2022

Secondary School Certificate | Good Shepherd EM High School, Nandyal, AP | CGPA: 8.7/10 | Jun 2019 – Mar 2020

PROJECTS

Face Emotion Detector | Python, OpenCV, DeepFace, Django, HTML, CSS, JavaScript, Bootstrap | 2026

- Built an end-to-end AI-powered facial emotion recognition system capable of identifying seven emotions (Happy, Sad, Angry, Fear, Surprise, Disgust, Neutral) from both static images and live video streams
- Leveraged OpenCV for robust face detection and DeepFace for deep learning-based emotion classification, enabling real-time prediction of facial expressions
- Developed a full-stack web interface using Django (backend) and HTML/CSS/Bootstrap/JavaScript (frontend) that allows users to upload media and instantly view detected emotions
- Applied computer vision preprocessing techniques and model integration best practices to deliver a functional and user-friendly emotion analysis application

Random Password Generator | HTML5, CSS3, JavaScript | 2026

- Engineered a secure, fully responsive web application that generates strong random passwords with customizable length and character sets (uppercase, lowercase, numbers, special symbols)
- Implemented efficient client-side JavaScript logic for dynamic password creation, improving usability and promoting better password hygiene
- Designed a clean, mobile-friendly user interface with HTML5 and CSS3, ensuring consistent performance and accessibility across devices

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C (Basic)

AI & Machine Learning: OpenCV, DeepFace, Computer Vision, Deep Learning Fundamentals, Scikit-learn, Model Evaluation Concepts

Data Science: Pandas, NumPy, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization basics

Web Development: HTML5, CSS3, Bootstrap, Django, JavaScript

Tools & Platforms: GitHub, VS Code, Jupyter Notebook, MySQL, MySQL Workbench, Eclipse, MS Office

CERTIFICATIONS & INTERNSHIPS

Artificial Intelligence Intern | Corizo | Oct 2023

- Completed intensive training on core AI concepts, machine learning workflows, and practical applications; strengthened foundational knowledge in intelligent systems

Advanced Data Science Intern | APSSDC | Feb 2024

- Gained hands-on experience in data science pipelines including data cleaning, exploratory analysis, feature handling, and introductory model building using Python

JavaScript Introduction | edX | Apr 2024

- Completed foundational certification covering core JavaScript concepts, DOM manipulation, and interactive web development principles

SOFT SKILLS

Problem Solving | Analytical Thinking | Team Collaboration | Time Management | Adaptability | Strong Work Ethic | Continuous Learning
